Kindergarten Unit 2

How the World Works

Central idea: Day and night impact our routines and lifestyles.

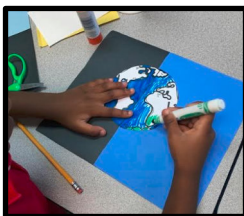

In Unit 2 students studied the day and night cycle and how it impacts our lives. They also explored various differences between day and night. Students learned about the impact the cycle has on animals as well, and learned about animals that are nocturnal. They had many learning engagements such as sorting day and night activities, and sharing photos of themselves during the daytime and nighttime!

Lines of Inquiry

An inquiry into the differences between day and night

An inquiry into how day and night cycles impact our lifestyles

An inquiry into how day and night cycles impact the people around us

KS1 students coloring in the earth!

Kindergarten's illustrations showing our earth at day and night

KS2 students brought in pictures of what they do during the day and during the night!

KM's project illustrating the differences between day and night.

Upcoming Unit

In this upcoming unit titled "Let's Celebrate!" students will learn about the many traditions and celebrations different countries celebrate around the world. Students will look into how traditions came about, how and why they are celebrated, and the history of those who started these traditions long ago.
